ALBRRYN R. BARRAS

IT Systems & Cloud Administrator

albrrynbarras@gmail.com

PROFESSIONAL SUMMARY

Experienced IT Systems and Cloud Administrator with expertise in Microsoft 365, Microsoft Intune, Microsoft Entra ID, endpoint security, and enterprise device management. Skilled in designing, deploying, and maintaining secure modern workplace environments across hybrid infrastructures.

Cloud & Microsoft 365 Administration	Microsoft 365 Administration, Microsoft Entra ID (Azure AD), Exchange Online, SharePoint Online, Microsoft Teams Administration, Microsoft Licensing, Hybrid Identity Management, Active Directory Administration, Azure AD Connect, Conditional Access, MFA, Windows Hello for Business, FIDO2 / Passkeys, Certificate-Based Authentication.
Endpoint Management & Intune	Microsoft Intune Administration, MDM, MAM, Application Packaging & Deployment, Device Compliance Policies, Endpoint Security Policies, Configuration Profiles, Windows Autopilot, Endpoint Provisioning, BYOD Management, Windows, iOS and Android device management.
Security & Cybersecurity	Microsoft Defender for Endpoint, EDR, Threat & Vulnerability Management, Security Baselines, Attack Surface Reduction, Antivirus & Endpoint Protection, Cybersecurity Monitoring & Reporting, Incident Response, Risk Mitigation, Bitdefender, Huntress, Connect Secure.
Infrastructure, Automation & Support	Windows 10/11, Windows Server, Hyper-V, Device Imaging & Deployment, MDT, Patch Management, Server Maintenance, IT Asset Management, PowerShell, CMD/Batch, Helpdesk Support, Remote Technical Support, Troubleshooting, SyncroMSP, Jira, ServiceNow, Network Troubleshooting, Technical Documentation.

PROFESSIONAL EXPERIENCE

IT HELPDESK (MSP) | 2023 - 2026

Network Management, LLC - Ohio, United States

- Manage Microsoft 365 environments for multiple clients, including user accounts, licenses, security settings, and tenant administration.
- Manage users and groups in Microsoft Entra ID and support hybrid environments connected to on-premises Active Directory.
- Handle onboarding, offboarding, account changes, license assignments, and access issues.
- Create and maintain Conditional Access policies and support MFA, Windows Hello for Business, FIDO2 Passkeys, and Certificate-Based Authentication.
- Manage Windows, iOS, and Android devices through Microsoft Intune, including application deployment, compliance, configuration, MDM/MAM, security policies, and Windows Autopilot.
- Monitor security alerts and investigate activity using Microsoft Defender, Bitdefender, Huntress, and Connect Secure; assist with remediation and reporting.
- Configure Microsoft Global Secure Access, including Entra Private Access and Internet Access.
- Create PowerShell/CMD automation, Power Automate workflows, SharePoint solutions, and Power Apps to reduce repetitive work.
- Provide remote technical support, troubleshoot Microsoft 365, network, hardware, software, and account issues, and manage tickets through SyncroMSP and other systems.

TECHNICAL SUPPORT ENGINEER | 2023

UNO Digital Bank: UnoBank - Integrated Computer Systems

- Supported Microsoft 365, Power Apps, Power Automate, SharePoint, and Amazon WorkSpaces.
- Packaged and deployed applications using Intune and IntuneWinAppUtil; configured applications, roles, security scopes, MDM and MAM policies.

- Deployed Windows 10 operating system images through MEM/SCCM and Windows Autopilot, including user-driven and self-deploying modes.
- Managed Windows, iOS, and Android devices, Azure/Office 365 users and groups, BitLocker-related support, and IT asset inventory.
- Resolved incidents and requests using Jira and provided Windows, MacBook, hardware, software, and remote desktop support.
- Created the UnoBank IT Assets Accountability form for deployment and exit clearance using Power Apps, SharePoint, and Power Automate.

TECHNICAL SUPPORT / END USER SUPPORT | 2022 - 2023

Manulife IT Delivery Centre Asia - e-Compserve Solutions

- Provided IT support for laptops, printers, peripherals, Windows, MacBook, Android, iOS, Microsoft 365, and VPN access.
- Supported Intune MDM and JAMF Cloud inventory, deployment, and security of Apple devices.
- Managed device provisioning and deprovisioning, desktop imaging, upgrades, security patching, configuration, and testing.
- Monitored ticket queues, prioritized requests, performed troubleshooting, incident management, root-cause analysis, and served as an escalation point.
- Worked with ServiceNow and supported user account setup, asset management, and day-to-day end-user operations.

DESIGNER - OFFICE STAFF | 2019 - 2022

House Research and Development Singapore PTE LTD

- Performed design and encoding work involving floor plans, bearing walls, panels, headers, columns, beams, and roof calculations in SSI System and CAD.
- Also supported manual printer setup, remote desktop sessions for work-from-home users, and hardware and in-house software troubleshooting.

SELECTED PROJECTS

Microsoft Intune Deployment

Implemented centralized management for Windows, iOS, and Android devices; created configuration, compliance, MDM, MAM, and security policies; packaged and deployed applications; standardized device setup and security settings.

Windows Autopilot Deployment

Streamlined device setup, application installation, and initial configuration, reducing manual work during new user and device onboarding.

Conditional Access & Authentication

Configured Conditional Access policies and implemented or supported MFA, Windows Hello for Business, FIDO2 Passkeys, and Certificate-Based Authentication.

Endpoint Security & Threat Monitoring

Deployed and managed Microsoft Defender for Endpoint, monitored alerts, threats, and vulnerabilities, investigated issues, assisted with remediation, and prepared security recommendations.

IT Automation & Workflow Improvement

Created PowerShell scripts, Power Automate workflows, SharePoint-based tracking solutions, Power Apps, automated reports, and administrative automations.

IT Assets Accountability Workflow

Created a digital IT asset accountability process for deployment and exit clearance using Microsoft Power Apps, SharePoint, and Power Automate.
